

Technical data sheet

## IGP-ANTIGRAFFITI 492SE-A1

Coarsely structured powder coating for exterior applications with excellent anti-graffiti properties and outstanding chemical resistance.

### Characteristics

- Silk gloss
- Coarse texture
- Pearl mica
- Mica Bond
- Industrial outdoor quality
- Antigrffiti

### Powder properties

Particle size:	< 3.94 mil
Solids:	> 99 %
Density:	10.85 lb/gal-13.35 lb/gal
Suitability for storage:	min. 12 months at $\leq 77$ °F in an unopened original container
Color tones:	RAL Metallic and individual metallic colors on request

### Processing

#### Pre-treatment

The substrate must be free from oil, grease and oxidation products. The pretreatment depends on the type of substrate and the corrosion protection to be achieved. We recommend the following pretreatments:

Aluminum

- Chromating according to DIN EN 12487
- Pre-anodization
- Chrome-free pretreatment according to GSB International and QUALICOAT specifications

Steel

- Zinc phosphating

Galvanized steel

- Zinc phosphating
- Chrome (III) passivation
- Chromating according to DIN EN 12487

For improved corrosion protection for applications on steel / galvanized steel, the use of corrosion protection primer IGP-KORROPRIMER 10 or IGP-KORROPRIMER 60 is recommended. The suitability of the pretreatment method used is generally to be tested by the coater in advance with appropriate test methods. The minimum requirement for aluminum substrates / galvanized steel components is to carry out a boiling water test with a subsequent cross-cut adhesion and tape test. We refer to the guidelines of the GSB International, Qualicoat and Qualisteelcoat certifications. For further information: see also our special leaflet on pre-treatment (IGP-TI 100).

### Coating devices

All conventional electrostatic systems with corona charging. For the construction and operation of powder coating plants, the following regulations must be complied with: ATEX RL 2014/34/EU, EN 50177, DIN EN 16985.

### Recommended film thickness

3.15 mil - 3.94 mil

A homogeneous coating result with textured coatings or article- and color-specific differences in hiding power may require higher coating thicknesses. The corresponding processing guidelines must be observed. For a pre-calculation of the required powder coating quantity, the necessary coating thickness must be determined for each article.

### Curing conditions

T <sub>Object</sub>	t <sub>min</sub>	t <sub>max</sub>
374 °F	15 minutes	20 minutes
392 °F	10 minutes	15 minutes

In order to determine ideal curing conditions, we recommend practical trials with the object in question and curing oven.

### Reclaimability

Small portions of recycled powder can be added, automatically if possible, to the fresh powder. Important: Keep overspray to an absolute minimum. Processing instruction VR 201.1 must be observed.

### Compatibility

Contamination with other powder coatings may result in a drop of the gloss level, cratering, loss of mechanical properties, etc. Devices and coating systems must be thoroughly cleaned before and after using the powder.

## Film properties

### Tested on

Substrate:	Aluminum (AlMg1), 0.8 mm chromium-free
Film thickness:	3.15 mil - 3.94 mil
Object temperature:	374 °F, 15 min.

### Mechanical tests

---

Cross-cut adhesion test	Gt 0	DIN EN ISO 2409 2020-12
Mandrel bending test	≤ 12 mm	DIN EN ISO 1519 2011
Impact test	≥ 10 inchp.	ASTM D 2794 1993
Erichsen cupping	≥ 2 mm	DIN EN ISO 1520 2007-11
Buchholz hardness	≥ 80	DIN EN ISO 2815 2003-10

### Weathering tests

---

QUV-SE-B-313, 200h	> 50 % residual gloss	DIN EN ISO 16474-3 2014-03
--------------------	-----------------------	----------------------------

### Corrosion tests

---

Condensation water test, 1000h	No infiltration, no blisters	DIN EN ISO 6270-2 2018-04
Natural salt spray test, 1000h	No infiltration, no blisters	DIN EN ISO 9227 2017-07

### Chemical tests

---

Cleaning	IGP-DURAclean® properties allow efficient removal of contamination by commercially available cleaning agents and/or disinfectants
----------	---

## More information

### Packaging

- 20 kg cardboard box with inserted antistatic PE liner
- 400 kg cardboard container with antistatic PE-liner
- 500 kg cardboard container with 25 antistatic PE-liners each 20kg

### Protection of coated parts

Coated parts should be packed after cooling with suitable materials without plasticizers. They should be stored protected from the weather to avoid the formation of condensation and thus water spots on the coating.

### Cleaning

The coated parts must be cleaned according to the directives RAL-GZ 632 or SZFF 61.01. Technical Information IGP-TI 106 must also be observed when dealing with pearl mica effects.

### **Graffiti removal**

The following procedure should be observed when removing graffiti: - The contact time of the graffiti with the surface must be kept as brief as possible - Preliminary tests to select a suitable graffiti remover - Thorough rinsing of the cleaned areas with water - The contact time of the graffiti remover with the surface must be kept as brief as possible IGP recommendation: - Elite 007 graffiti remover from Crous Chemicals GmbH - Socostript T4210P from Socomore - Bonderite S-ST 1302 and Bonderite C-MC 400 from Henkel AG - or a different non-abrasive cleaner

### **Paint removal and disposal**

After use, coated goods should be supplied to the normal recycling process. The disposal methods for sludges or residual powders must be observed in accordance with the local official provisions whilst taking Waste Code "080201 Coating Powder Wastes" in accordance with the European Waste Catalogue into consideration.

This application-related advice is given to the best of our knowledge. However, this information is non-obligatory and does not exempt you from carrying out your own tests. Application, use and processing of these products are beyond our control and are therefore on your responsibility.

Consult the Safety Data Sheet prior to use. Article-specific safety data sheet and comprehensive risk management measures available at: **[igp-powder.com](http://igp-powder.com)**
