IGP POWDER COATINGS

References

Elektrownia Powiśle

The former power plant looks resplendent following its renovation, during which a total of 4,000 kilograms of IGP powder coating was used. The building is located in the center of Powiśle and now serves as a central hub after its transformation into a lively meeting place.

IGP POWDER COATINGS

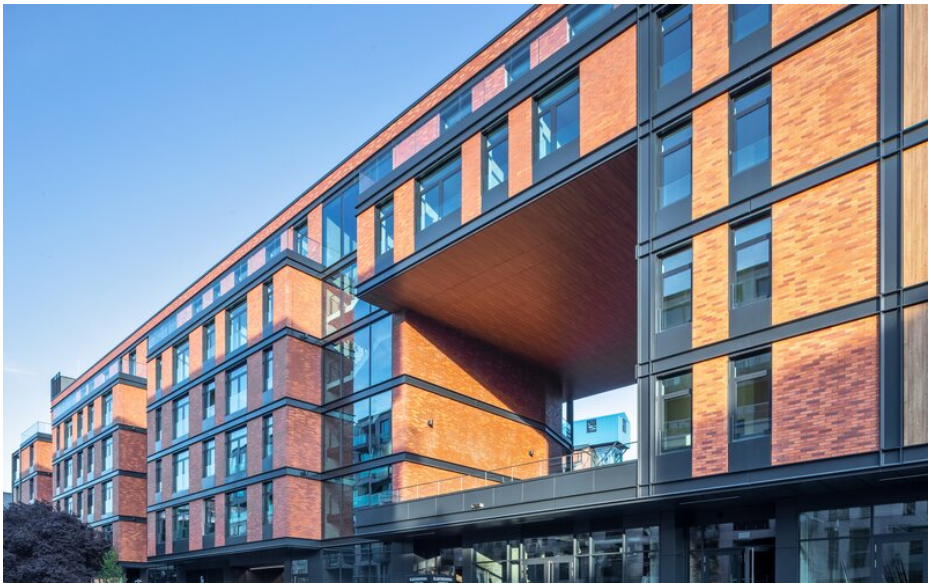

Details

After several years of disuse, the architectural firm APA Wojciechowski Sp. z o.o. breathed new life into the building. It has been transformed into a luxurious complex with offices, a hotel, residential spaces, edgy shops, and first-class restaurants.

The super durable powder coating IGP-HWFclassic 591TE71319A30 was used for this project and applied by the coater Aluprof S.A.

The architectural images were provided by photographer Marcin Czechowicz.
