IGP POWDER COATINGS

References

Neo Bankside

The Neo Bankside project is located in the center of London's Bankside district, where cultural, commercial, and residential communities intersect amid a diverse and thriving architectural environment. It is located close to the banks of the Thames and comprises 217 residential units in four buildings ranging from 12 to 24 stories.

Details

The industrial-style façade is inspired by the history of the surrounding area, which was dominated by industry. It combines this industrial aesthetic with the local architecture by bringing together the shades of the surrounding buildings. It reflects the red brick tones of the Victorian buildings of Southwark Street and the Tate Modern, through to the sharp steel and glass elements of Bankside 123. The façades are of high quality and the external bracing adds a degree of visual depth.

The architectural images were provided by photographer Art Gray.
