IGP POWDER COATINGS

References

Alsik Hotel

The Alsik Hotel is a 19-story building with an intriguing façade mix consisting of glass and IGP powder-coated façade components, which exude a wonderfully warm glow in the right lighting conditions and harmonize beautifully with the historic buildings in the surrounding area.

Facts

Area	Architecture

Details

An illuminated viewing platform references the lighthouses that can be found in many of Denmark's harbor towns. The Alsik Hotel & Spa is nevertheless a landmark in its own right, while at the same time respecting St. Mary's Church and its tower, another distinctive feature of the skyline. A total of 3.5 tons of IGP powder were used for this majestic building.

The architectural images were provided by photographer Hufton+Crow.
