IGP POWDER COATINGS

Details

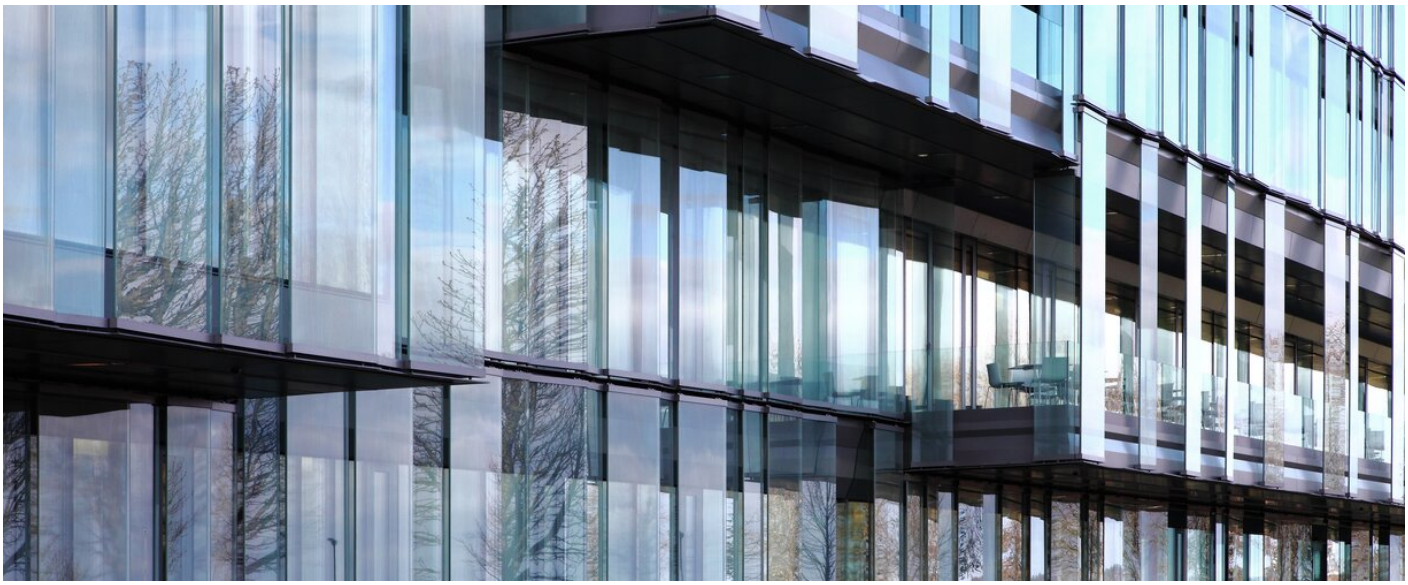

A place for encounters, art, services and enjoyment. Würth Haus Rorschach is a versatile venue that combines various functions.

It houses the Carmen Würth Hall as well as other meeting and seminar rooms, which are ideal for events of all kinds. In addition to the conference rooms, public areas and the Weitblick restaurant are also available for events. A spacious outdoor terrace with a view of the lake is also available all year round.

Würth Haus Rorschach not only serves as an event venue and art gallery, but also houses various Würth Group companies that offer their services there.

For this extensive project, parts of the exterior façade were coated with 4,562 kg of IGP-HWFclassic 5903 powder.

The architectural images were provided by photographer Thies Wachter.
