IGP POWDER COATINGS

References

Quadrolith

The claim "Simple. Goldrichtig." is not only used as a slogan, but is also a central component of the building's exterior design. The detailed façade shines in various shades of gold, conveying an elegant and fascinating aura.

IGP POWDER COATINGS

Details

The Quadrolith in Baar consists of two U-shaped commercial buildings with six storeys, which provide space for up to 1000 workstations. The opening of the buildings to the north creates a spacious terrace for relaxing and enjoying the sun, as well as further terrace areas on the roofs of the buildings.
The façade of the building consists of a mix of dark brown and gold-colored façade elements and a vertically accentuated window grid coated with powder IGP-Dura®xal **4201**. This creates great accents and a modern-looking building.

The architectural images were provided by photographer Alfred Müller AG.
