IGP POWDER COATINGS

References

Schreinerei Fust

The Fust joinery has stood for customized solutions in interior design and furniture construction since 1997. With around 80 employees, the company produces high-quality work for industrial, commercial and private customers. As a pioneer in the powder coating of wood, Fust combines traditional craftsmanship with modern technology - for long-lasting, robust and aesthetically pleasing results.

Products	IGP-RAPID®top 38

Details

In this project, the Fust joinery relies on its innovative combination of laser technology and powder coating - a process that perfectly combines functionality and design. The result is a surface that is not only visually impressive, but also scores with its suitability for everyday use: robust, easy to clean and durable.

Powder-coated fronts - aesthetics and robustness combined
In this project, a kitchen island was realised in which almost all visible fronts were powder-coated. The powder coating enables particularly clean and smooth edges - a great advantage over classic painting, especially for complex shapes. The colour mushroom and the characteristic L48 "Terreno" laser pattern were used. The only exceptions to the powder coating are the worktop, the sink, the faucet and the recessed handles. The interior consists of classic carpentry work without powder coating.

Thanks to the laser structuring, each front has a unique, natural look. The surface remains scratch-resistant, insensitive to moisture and is particularly easy to clean - ideal for everyday use in modern living and working environments.

Innovation meets craftsmanship
The combination of precise laser technology and high-quality powder coating makes it possible to incorporate individual designs directly into the wood and protect them permanently. This process combines creative freedom with technical perfection and opens up new ways of designing furniture and interior fittings.
