IGP POWDER COATINGS

References

Dreiklang

The Dreiklang residential and commercial building in the Sursee region is an outstanding example of contemporary urban development. The new building is characterized by striking, modern architecture with clean lines and an open-plan design. The flexible apartments and commercial spaces are functional in design and feature high-quality materials and modern fittings. The result is a pleasant, future-oriented living and working environment.

IGP POWDER COATINGS

Details

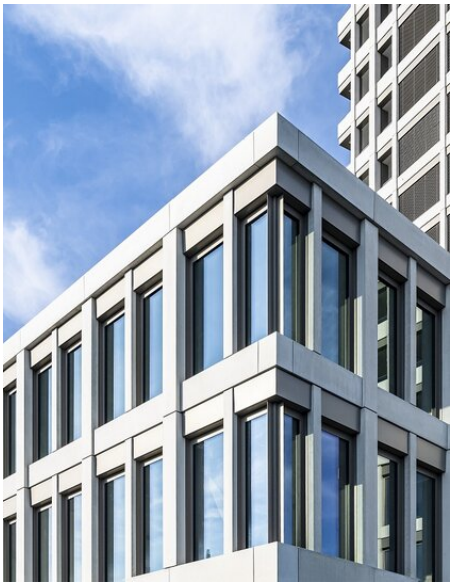

The three main buildings of the project are arranged in a triangular layout, which gives the ensemble its name and creates a distinctive silhouette. The facades are made of high-quality, durable materials such as glass, concrete, and natural stone, which are not only aesthetically pleasing but also functional and sustainable.

The project, designed by the architectural firm MBA Architekten AG, was supported with powder coatings from IGP Powder Coatings. Metal components such as window frames, balconies, railings, and decorative elements were coated with approximately 3,500 kg of the product IGP-HWFclassic 5903E82301S3F. This ensures high durability and resistance to weathering.

The powder coating blends harmoniously with the modern and elegant aesthetics of the Dreiklang residential and commercial building. The smooth surface and precisely coordinated color scheme emphasize the architectural details, lending the building a contemporary elegance while also providing protection from the elements and ensuring a lasting attractive appearance.

With its clear architecture, generous green spaces and outdoor areas, and strong focus on sustainability, the new building offers both aesthetic and functional advantages. Dreiklang Sursee is a living example of how innovative planning, high-quality materials, and architectural standards can lead to an attractive and sustainable result.

The architectural images were provided by photographer Pius Amrein.
