IGP POWDER COATINGS

References

Administrative center, Guisanplatz

The construction of the administrative center on the Guisanplatz in Bern has adorned the cityscape's northern edge with an urban building block inspired by traditional military installations. Step by step, a building landscape is being created here that connects the neighboring districts.

IGP POWDER COATINGS

Details

The administrative center is situated in an architecturally diverse area, surrounded by residential neighborhoods, a football stadium, the Allmend, and the Expo grounds. The architects opted for IGP-HWFclassic 5903E81576F3F as the coating for the window elements. This super durable powder coating was used to coat the façade elements and perfectly matches the color of the building. The elements were coated by Fahrni Fassadensysteme AG in Lyss.

The architectural images were provided by photographer Rolf Siegenthaler.
